

GORDON ENERGY  
SOLUTIONS

October 13, 2005

It gives us great pleasure to introduce ourselves and to announce the formation of a new energy research and consulting company, Gordon Energy Solutions, LLC.

While our company is new, we are not new to the business. Richard Gordon has worked in the industry or as a consultant to the industry since 1981.

Our focus is forward-looking, critical, and independent analysis of energy companies, the decisions they are likely to make tomorrow and the implications of those decisions for the future – their future and your future ability to compete.

The data and analytic tools we have developed and the innovative methods we apply to any project in which we participate are part of a comprehensive, second-generation perspective and modeling capability not available anywhere else in the industry. We believe that the timing for our new approach is right – the energy industry is changing in fundamental ways.

Richard G. Gordon  
President

Steven J. Gordon  
Vice President
